

## Workshop on Innovations in DSO Regulation

### *How to engage customers and utilize their flexibility?*

In response to the ongoing technological and digital transformation of the traditional distribution network, a regulatory reform is also underway. To debate current and future regulatory developments, this workshop brings together academics, network operators, policy advisors and regulators. During the first session, the discussion will focus on how network regulation can enable technological change, while ensuring not only cost efficiency but also promoting fairness among customers. During the second session, the debate will concentrate on how network regulation can encourage customers to efficiently utilize their resources and provide flexibility services.

#### Agenda

- 12:00 - 12:30 Walk-in & Lunch
